Dear fellow musicians,

Since our last update, we've been hanging with some of TV's top super stars from the mega hit series American Idol. We were honored to provide amplifiers for Paul Abdul's half-time Super Bowl preview and video on Randy Jackson's Club Volume 1 single featuring Paula Abdul, Randy Jackson and Oliver Leiber.

In addition, we have been working with friends at LA's biggest recording studios on some new upcoming albums. Spending quality time with our music stores and enthusiasts like you.

We invite you to read our newsletter and share in the exciting artist news and products we have to offer. So grab your favorite comfort food and drink and enjoy the innovations from Kasha Amplifiers.

Thank you,
John Kasha

Super Bowl Pre-game 2008

It's not every day to be asked to use your gear for Super Bowl pre-game, and a new video with America's top TV personality and performing artists like Paula Abdul and Randy Jackson. It was such an honor and privilege to hang with them. Many thanks to Oliver Leiber on guitar who made it all happen.

Kasha Amplifiers welcome Oliver Leiber to the Kasha family. Oliver wrote a number of Paula's early hits and was very instrumental in her latest project with Randy Jackson. You will be hearing more Kasha amps with Oliver in the future. What a ride this was...

Platinum Studio Engineer

Mike Plotnikoff

Studio Engineer
(American Rejects, Buckcherry...)

"I was looking to get my Marshall classic JCM800 modified since the tone was thin and brittle. I was working with artist Phil X and he turned me on to Kasha Amplifiers that had a device that could instantly modify my amp without taking it in to a technician. It took a couple minutes to install and I was amazed how thick my tone was with tons of sustain. I work with the music industries top artists and would recommend using it to any pro guitarist", said Michael Plotnikoff engineer at Bay 7 Studio. Michael's engineering credits include Daughtry, All American Rejects, Buckcherry and Three Days Grace just to name a few.

Kasha Amplifiers welcomes Mike Plotnikoff to the family. Mike has worked with the best artists and producers in the industry. Mike is now using our 4x12 cab and Quikmod. We want to give a special thanks to Phil X for the recommendation. Phil continues to use out gear in the studio and live. Phil X and Mike Plotnikoff ROCKS!

Paul Jackson Jr.

Freedom CAB's specifications:

Paul Jackson Jr. called and asked if he could check out a Quikmod in one of his amps. We went to Paul's cartage company in Burbank to show him the unit in action. Paul connected the Quikmod to his Matchless DC30 and was blown away. See the first reaction to the Quikmod from Paul on our website. www.kashaamplifiers.com.

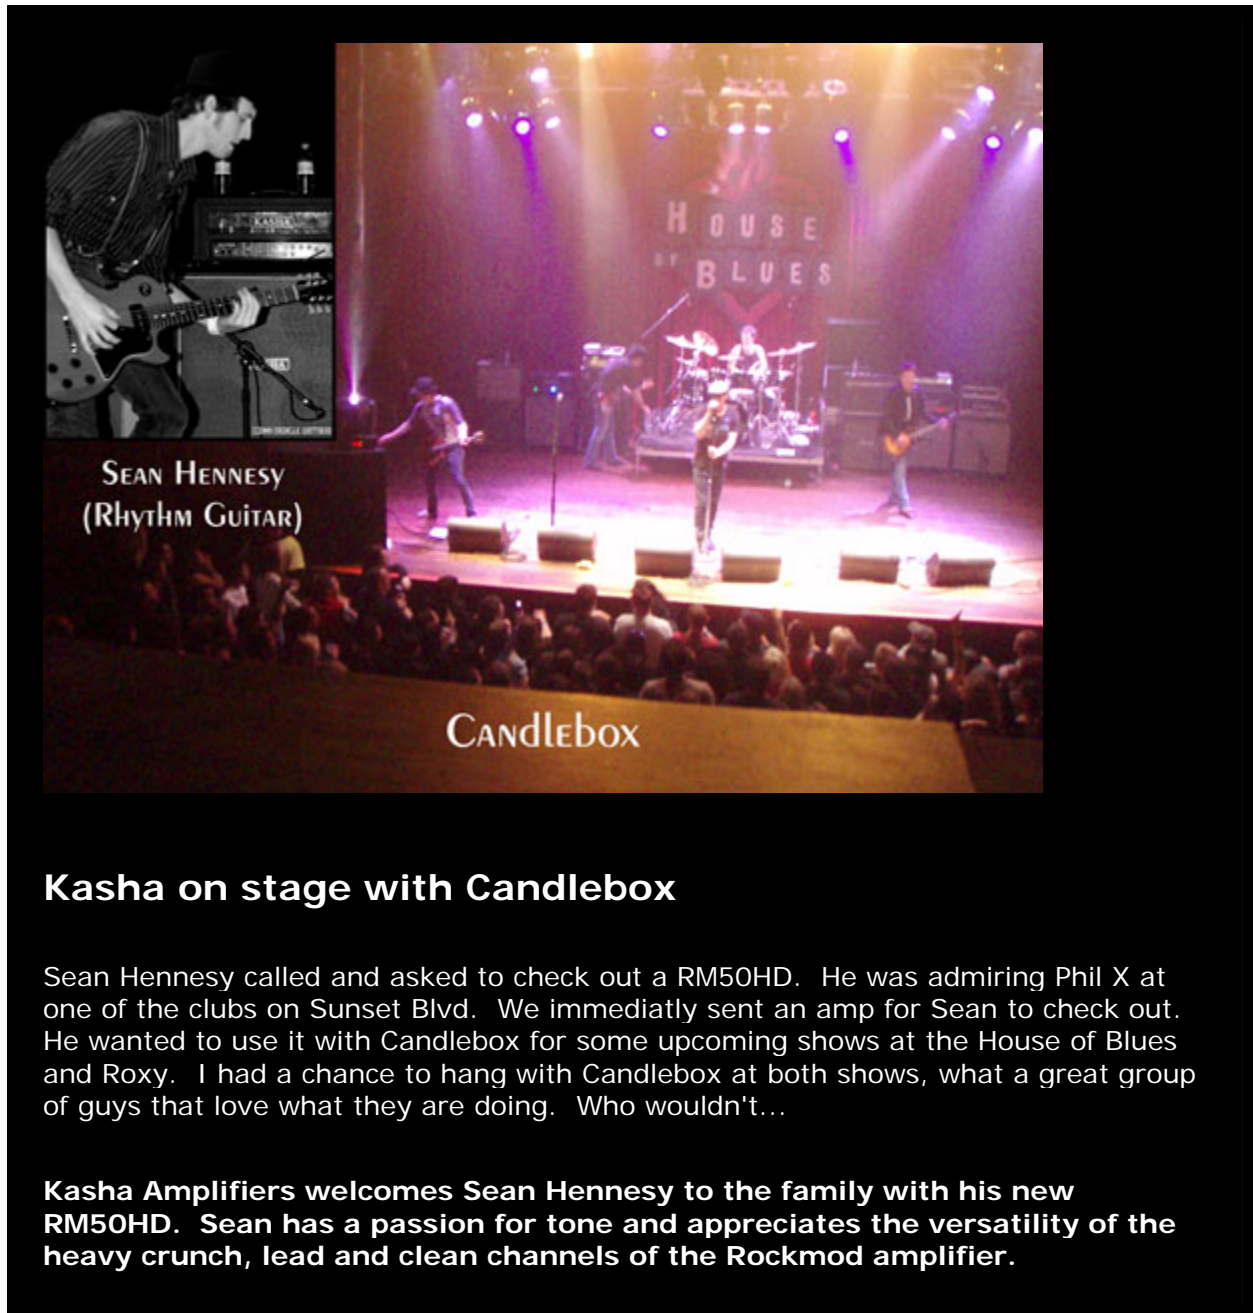

Paul has been in the family since the inception of Kasha Amplifiers. Paul is one of the nicest and most carrying musicians I know. We are honored and thrilled to have Paul play our gear. See him on American Idol and other TV shows during the week.

Quality Craftsmanship

Many customers ask how we make our amps. The answer is with plenty of TLC.

We start with a amp design called the Rockmod proven over 20 years to be a world class tone machine. All Kasha Amplifiers products are made in the United States of America. We use parts purchased from U.S. companies. Aircraft grade metal aluminum chassis made to our spec. Powder coated by the best company who paints motorcycle parts for custom shops. Install the best transformers made by Mercury Magnetics and designed by the founder proven for reliability and performance. Solder, wire, fasten, and assemble the entire unit always paying attention to detail. We use experienced cabinet makers with years of making great hand crafted guitar speaker cabinets installed with Celestion speakers. The tolex covering is seamless, fitting like a glove using industrial grade adhesive. We test, burn in, and test some more. We have a proven and reliable quality process that is home grown for product that will last a life time.

Kasha on stage with Candlebox

Sean Hennesy called and asked to check out a RM50HD. He was admiring Phil X at one of the clubs on Sunset Blvd. We immediatly sent an amp for Sean to check out. He wanted to use it with Candlebox for some upcoming shows at the House of Blues and Roxy. I had a chance to hang with Candlebox at both shows, what a great group of guys that love what they are doing. Who wouldn't...

Kasha Amplifiers welcomes Sean Hennesy to the family with his new RM50HD. Sean has a passion for tone and appreciates the versatility of the heavy crunch, lead and clean channels of the Rockmod amplifier.

Phil X in the Studio with Orianthi

Phil X has been playing and recording out of his Kasha RM100HD at Bay 7 Studios. Phil X (Left) has been working with Australian guitarist/singer/songwriter Orianthi (right) on some new tunes for her next CD. Orianthi was a delight and can shred with the best of of them. Just ask Steve Vai and Carlos Santana who who jammed with her at some recent concerts. Phil and Ori ROCKS!

(Phil X not included)

R412
(4x12 Robo-CAB)

R112
(1x12 Robo-CAB)

S12
(1x12 Straight)

Raves

We have been getting many e-mails from satisfied customers. This rave came from a customer in Canada after receiving the product. All the information was copied from the original e-mail.

Rockmod 50W head

I got down to pick the head up on Friday. Everything is in working order - no damage to any tubes or anything as far as I can tell (haven't tried the effects loop or any of that yet). Thank you very much for the outstanding packing job you did!

The amp sounds awesome! Exactly what I was looking for... great tones and flexibility (my JCM800 sounds great, but is very limited). So many great tones in this amp. For example, I love the Crunch

channel with the guitar volume backed down for dirty cleans like Phil-X did in his promo video. I'm sure I'll be figuring out the tones from that amp for a while yet.
Thanks again for everything, it has been a pleasure dealing with you and your amp.
Cheers!
Jeff
